## Experience

---

### **NCC Group | Junior Developer December 2024 – Present**

Full-time, Hybrid

### **Achieve Without Borders Inc | Junior Full Stack Developer (Python) June 2023 – December 2024**

Python, Odoo, PostgreSQL, Amazon Web Services, Docker, NGINX, BASH/Shell, Ubuntu

Full-time, Remote

- Automated critical business processes like invoice processing, reducing manual intervention from 6 hours to minutes by implementing retry mechanisms and scheduled scripts.
- Designed, developed, and maintained web-based and cloud-based applications
- Implemented customizations and enhancements to existing software applications.
- Created and maintained comprehensive technical documentation (e.g., technical designs, configuration guides, installation guides), and resolved complex software development issues.
- Designed and implemented scalable APIs and custom business logic to streamline integrations between Odoo and FarEye, improving data flow and operational efficiency.

### **Zelene Technologies Inc | Back-end Developer March 2023 – May 2023**

Python, Django, MySQL, JavaScript, TypeScript, Next.js, Ant Design, docTR

Freelance, Remote

- Designed and implemented scalable RESTful APIs.
- Developed a web OCR app backend, wherein receipt details are automatically extracted.
- Collaborated with a front-end developer to ensure seamless integration and feature quality.

### **Cagayan State University | I.T. Support / Programmer December 2013 – March 2014**

Visual Basic 6.0, Microsoft Access

OJT, On-site

- Developed a Computer Lab Inventory System to streamline asset tracking and management.
- Installed and configured software on lab computers; performed troubleshooting and repairs on malfunctioning systems.
- Reformatted and optimized computers to ensure smooth operation and readiness for use.
